

How to deal with abbreviated journal titles

When abbreviated journal titles are entered in the journal's name record field, EndNote uses these abbreviations in your article's bibliography. A lot of styles use full journal names in the bibliography, and the abbreviated journal titles have to be changed by hand **OR**.....

by means of so called '**Terms lists**'. These tell EndNote how to deal with abbreviated journal titles.

[View tutorial on how to handle Terms Lists](#)

When EndNote is installed on your own computer 'Terms lists' are installed as well, but they need to be connected to a specific EndNote Library to become active.

Term lists are located in the directory in which you installed EndNote locally, or you can import them from the campus network directory: **N:\UB_UB\Endnote\Terms lists**

When all terms lists are imported into an EndNote library it will become sluggish. Connect only appropriate term list(s) to a EndNote library.

► EDUCATION (N:) ► UB_UB ► Endnote ► Terms lists

Search Term

Terms Lists can imported from the N-directory on the campus network
