

Atomic Search

This tool facilitates searching for course content.

On the dashboard you can either use the search window in the top right,

Or the Search option in the global menu to search for content in all your courses.

To search content in a specific course use the search window in the top right from within the course.

You can do wildcard searches (e.g. test*). To search for word combinations use quotation marks, e.g. "global theory".

See this [video](#) for more information.
