

## Exporting references from the SciFinder® to EndNote®

Next:

Next: (at the bottom on the page) click 'Open' (see picture below). Clicking 'Open' forces EndNote to start and the references will be imported in the EndNote library which was last used.

Duplicates were not automatically removed. Answer set exceeds 10,000 reference limit.

1. **Classification of the adenylation and acyl-transferase activity of NRPS and PKS systems using ensembles of substrate specific hidden markov models** [Full Text]

Text  
By Khayatt, Barzan I.; Overmars, Lex; Siezen, Roland J.; Francke, Christof  
From PLoS One (2013), 8(4), e62136. | Language: English, Database: CAPLUS

There is a growing interest in the Non-ribosomal peptide synthetases (NRPSs) and polyketide synthases (PKSs) of microbes-fungi and plants because they can produce

The presence of microbial agents on the research and application in aquaculture including the production and prevention of fish diseases and the abuse of antibiotics, water quality improvement and prevention of harmful cyanobacteria were summarized. The problems and the further outlook on research and production of probiotics in aquaculture were suggested.

4. **Bactericidal property and biocompatibility of gentamicin-loaded mesoporous carbonated hydroxyapatite microspheres** [Full Text]

By Guo, Ya-Jun; Long, Teng; Chen, Wei; Ning, Cong-Qin; Zhu, Zhen-An; Guo, Ya-Ping  
From Materials Science & Engineering, C: Materials for Biological Applications, Ahead of Print. | Language: English, Database: CAPLUS

Implant-assocd. infection is a serious bone filling materials, achieving susta
